NANNY-APP · PRODUCT & ENGINEERING

# App Flow Document — Web + APK

Role journeys, navigation maps and screen transitions

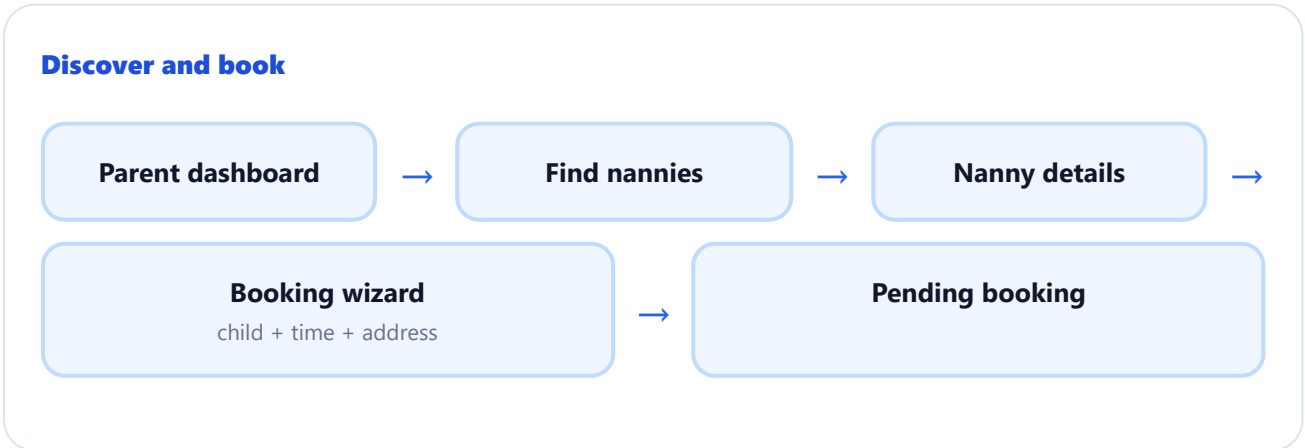

Version 1.0 10 October 2026 Status: implementation baseline + launch requirements

## 1. Entry and authentication

Forgot-password and reset routes return to login. Suspended or unverified accounts receive controlled errors. An administrator who attempts Android login is directed to the web portal.

## 2. Parent journey

**Session and completion**

Supporting routes: children, saved nannies, payments, messages, notifications, profile, support, policies and logout.

## 3. Nanny journey

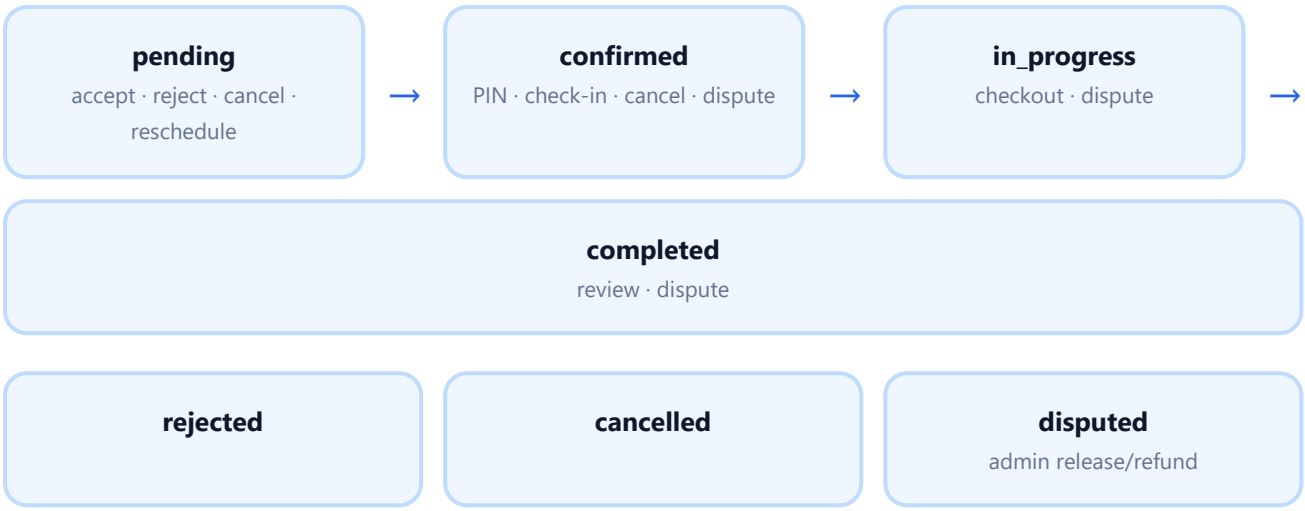

Only verified, active nannies with a positive rate and valid availability appear in parent search and accept new bookings.

## 4. Administrator journey (web only)

Operational pages include dashboard, action centre, verifications, users, bookings, payments, support, contacts, messages, reports, notices and profile.

# 5. Booking state transitions

# 6. Web and Android screen mapping

| Capability | Web | Android APK |
|---|---|---|
| Parent care journey | Dashboard, nannies, booking, children, saved, payments, review | Native equivalents |
| Nanny work journey | Dashboard, bookings, availability, earnings, reviews, profile | Native equivalents |
| Shared | Messages, notifications, profile, support | Native equivalents |
| Public content | Full pages/forms | CMS view plus link to complete web page |
| Administration | Full admin portal | Unavailable by product policy |
| iPhone/iPad | Responsive PWA / Add to Home Screen | No native iOS app |

# 7. Alternate and error flows

- Booking conflict → remain in wizard, show safe conflict message and allow another time.
- Invalid/locked PIN → retain confirmed state; parent regenerates after attempt limit.
- Offline/private route → show network error; do not serve cached account data.
- Expired bearer/session → clear local account scope and return to sign-in.

- Dispute → retain ledger state and queue admin review; never imply automatic money reversal.
- APK absent → disabled download state and PWA installation guidance.
